

Learnovate Fairtest

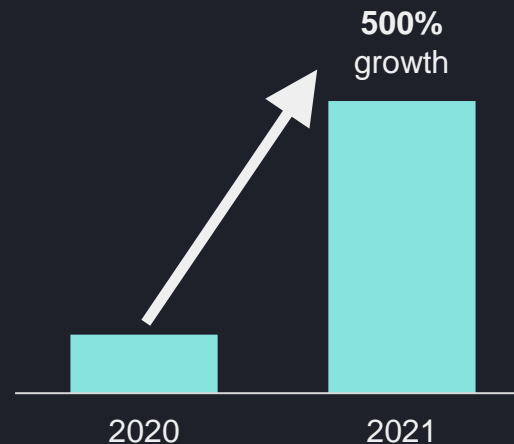

AI-assisted exam proctoring for university professors & TAs

Problem

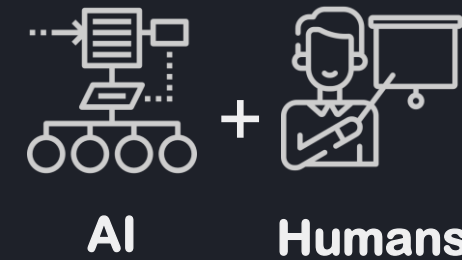

Cheating on online exams is so common that non-cheaters are getting frustrated & angry

Opportunity

Automated proctoring using AI led this growth but has triggered privacy concerns & lawsuits.

Solution

- Trusted by students
- Good at monitoring many students
- Great at making judgment calls

We use AI to identify anomalies and refer them to human judgment for the best of both worlds.

Fairtest is launching in Spring 2022! Contact us at jc@learnovate.ai for details.
